(SMU) & Director (CBS Maritime)

In Conjunction With

26 April 2023
2.00 PM to 6.00 PM

Begonia 3011
Marina Bay Sands
Convention

Synopsis

International shipping must move to net-zero emissions to meet the 1.5 degrees Celsius ambitions of the Paris Agreement, which requires a 100% renewable energy mix mid-century. The piloting of route-based solutions between ports is an appropriate way to turn ambition into action.

The needed technology is well-known and rapidly improving but there is uncertainty regarding the development of appropriate incentives, business models, and forms of governance, which is the focus of this Thought Leadership conference.

Speakers

Mr. Christopher Dirzka, Post-Doctoral Fellow
(Copenhagen School of Energy Infrastructure, CBS)

Prof. Hanne Harmsen, Vice Dean for Green
Transition (CBS)
